

This particular edition shall be referred to as the February, 2004 edition. The JCR book is being re-printed in its entirety for this edition. You will note a 02/04 in the top right-hand corner of each page. Many, many revisions have taken place since the initiation of the JCR Book, in what appears to be October, 1974.

Included is a Reference Index of the previous JCR number and the new identifying number.

It requires plenty of time and energies to review, edit, and revise these JCRs periodically. We sincerely appreciate the efforts of those individuals at AIA of SC and at CAGC, who played a major role in getting this mammoth task accomplished, as we present the latest edition of the Joint Committee Recommendations in its entirety.

This recommendation, while not mandatory, is the diligent work of a committee which is drawn from a cross section of the construction industry represented by architects and general contractors. The committee presents this recommendation with the expectation that it will be adhered to voluntarily.
